That is fine; I only have one meeting schedule for today. Betty has a 10:00 but otherwise I think her calendar is clear.

I should probably clarify assigned as in a contact so the tester can call someone. If it's you and Betty we will do our best not to call unless its urgent.

Thanks!

Hello Tonya, we don't have anyone that can be assigned to work your staff this week. Betty Mattice and I will try to be available to help in any we can to assist with testing.

Thanks Brigid

Hey Brigid

I called you first, but I know my day will get going and I will not remember to call back. We have MVSC (third party vendor) here this week for testing. We are running into situations that we need SSG support. Do you have someone you can assign to us this week. I don't want the vendor to complain about our internal process delaying them from completing the transactions timely. So I am just trying to be proactive, let me know your thoughts.

thanks

Tonya
